Introduction to Woodcrafters

WOODCRAFTERS

Since 1973, building contractors, woodworkers and do-it-yourself homeowners have turned to Woodcrafters for what they need from our stock of over 15,000 items useful to every building or remodeling project. Woodcrafters is also your headquarters for hard-to-find items. If we don't have it in stock, we will do our best to track it down from one of our many sources in the industry, so that you can get it on time and at the right price. And if you have yet to visit Woodcrafters, you've got a treat waiting for you. We pride ourselves in providing for our customers a pleasant experience among one of the most extensive selections of woodworking tools, finishing products, exotic hardwoods, related books & instructional DVDs found anywhere, and much more.

Moldings as Design Elements

Moldings are important to the overall decorative appearance of any room. The major elements of modern trim – baseboard and wall moldings, casings and crowns – have traditionally followed a certain logical visual progression.

When viewing a typical interior wall from eye level, we expect to see a graduated progression of visual elements. We imagine the foundation to be solid enough to support the structure above. Therefore the heaviest of the bunch, base moldings, are placed at the bottom of the wall, to impart a sense of strength. Crown molding is generally coved where it meets the wall and rounds out gracefully helping the wall seem to flow into the ceiling.

Moldings are often used to create other visual impacts as well. Installing a chair rail divides the wall into two sections, creating the illusion of widening the room. Picture hangers tend to bring down the ceiling, imparting a more cozy feel to a room.

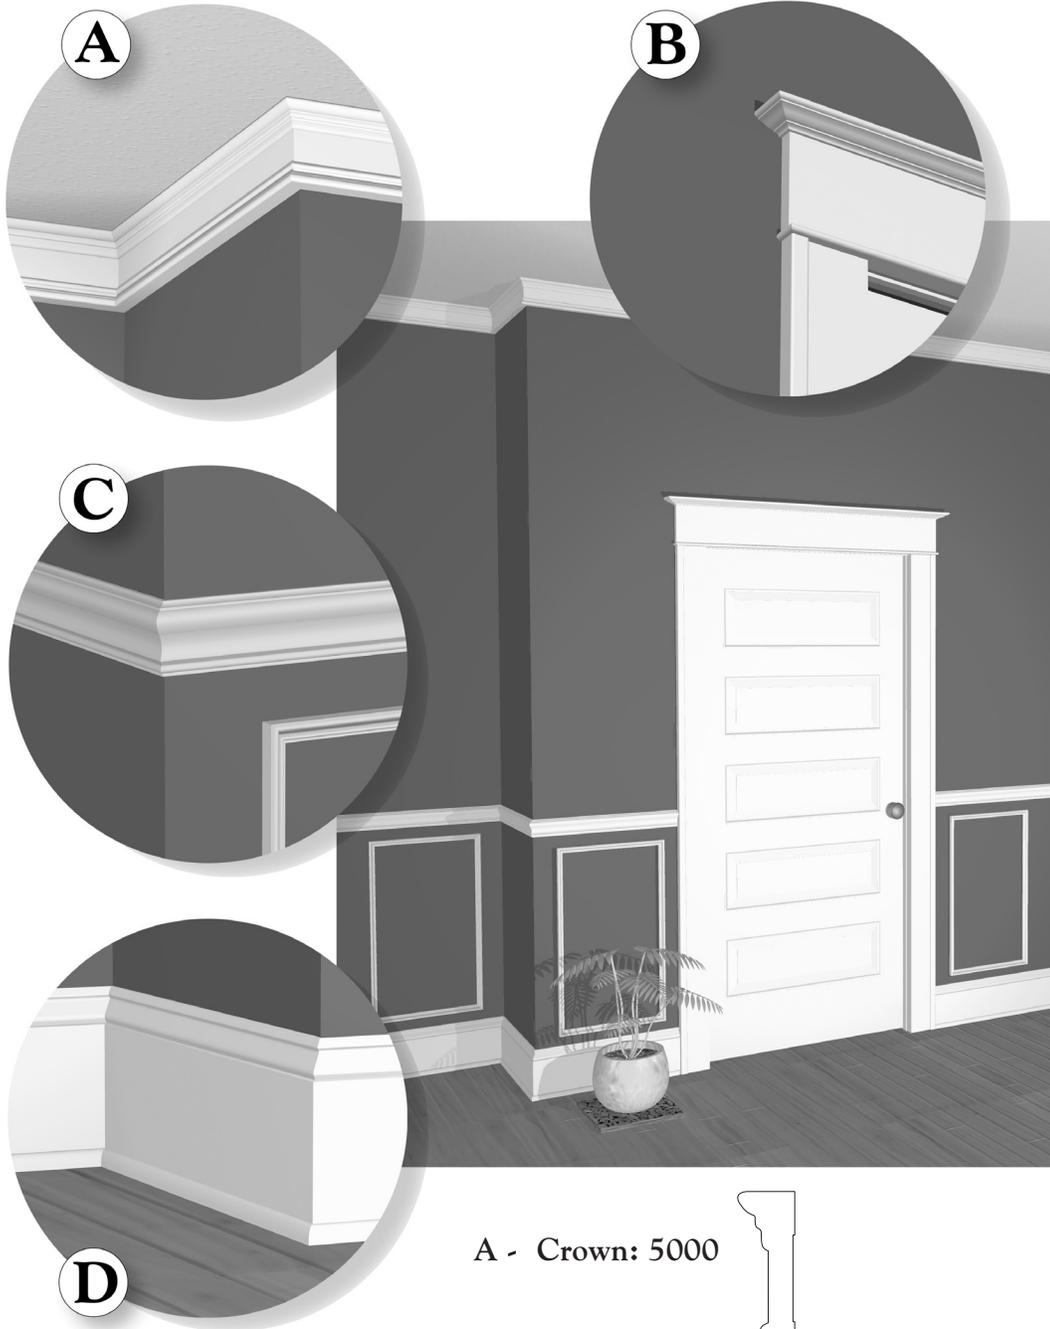

At Woodcrafters, we have a large selection of do-it-yourself books and videos that take you through the steps of choosing molding profiles for many different applications, and then help you install them successfully.
